

Rescheduling an Appointment

Nobody home, or need a different time? Move it yourself in the app.

The short version

You do **not** have to call the rep to reschedule. If nobody's home (or you just need a new time), you can pick a new date & time yourself — right on the homeowner's deal in your PA portal. It cancels the old appointment and books the new one.

How to reschedule — step by step

1. Open the homeowner's deal in your PA portal.
2. Tap “**Schedule / reschedule appointment.**”
3. You'll see **your** open times for the next 2 weeks (only your availability). Tap the new day and time that works.
4. Since they already have an appointment, it asks “**Reschedule to the new time?**” — tap **OK**. That cancels the old appointment and books this one.
5. Done. The homeowner (and the rep) get a message with the new time, and it shows in your upcoming appointments.

Good to know

- Only **your** open times show. Need more times available? Open them under your **Availability** tab.
- Rescheduling **replaces** the old appointment — it doesn't create a duplicate.
- No time that works in the next 2 weeks? Open more slots under Availability, or contact the office.
- This is the same day-by-day calendar the reps book from — just filtered to you.
